

## Thirst Project Assembly Topics Outline

FREE, 40-45 minute, interactive presentation that covers the global water crisis and how we can END it. Topics will be covered via powerpoint presentation and a 15 minute video component. The following is an outline of our presentation...

### **The Scope of the Global Water Crisis**

- Where is the global water crisis
- How many people are affected by the global water crisis
- What is the impact of the global water crisis on everyday life
- How does the lack of access to clean water affect disease and mortality rates

### **Water and its Impact**

- How does clean water positively impact the health and sanitation of a community
- How does clean water positively affect communities and their education level
- How does clean water change the scale of economic growth for a community

### **Impact Assessments of the Global Water Crisis**

- What are some case studies of specific individuals that have been impacted by the water crisis

### **Our Solution to the Global Water Crisis**

- What is the impact of a sustainable water project on a community of people
- What is the strategy in our commitment to giving an entire nation access to clean water

### **Youth Activation**

- What have students done in the past to fundraise and raise awareness for Thirst project
- How can students get involved in our movement and help bring people access to clean water

*We also offer supplemental content supporting studies in biology, health (public health), social studies, and geography classes.*
